

TULSI PATEL

+1(909)662-1570 | tulsiibasil@gmail.com | [LinkedIn](#) | [Website](#)

Multidisciplinary designer and researcher with experience in audience research and digital content strategy. Proven ability to communicate across disciplines, from engineers to C-suite stakeholders, while maintaining deep involvement in research, design, and technical implementation throughout the entire product lifecycle.

EDUCATION

Yale University, New Haven, CT Graduated May 2023
BA in Digital Studies with extensive coursework in Cognitive Science and Data Science
GPA: 3.85

PROFESSIONAL EXPERIENCE

Liquid City, London, UK September 2023 - June 2025
Designer

- Lead UX architect for 10+ experimental AR/AI projects across Vision Pro, Meta Quest, and confidential AR platforms, delivering enterprise experiences from 4-week rapid prototypes to 4-month production cycles.
- Developed novel interaction paradigms and design systems for AI personality interfaces, establishing new standards for spatial computing that became client frameworks for future development.
- Directed project strategy as primary UX researcher for cross-functional teams, conducting discovery and rapid research-to-prototype cycles that shape project direction before technical development begins.
- Presented to C-suite executives, translating complex spatial computing concepts into compelling narratives that secure project approval and continued investment across 7+ tech platforms.
- Created marketing content and storytelling materials that enhance studio visibility in client pitches and industry platforms, contributing to business development and sustained client relationships.

Experiment Zone, Remote July 2023 - January 2024
UX Designer

- Redesigned dozens of webpages using Figma to improve client sales through CRO (conversion rate optimization), focusing on visual hierarchy and legibility while maintain client branding preferences.
- Analyzed user behavior and data from A/B tests to find pain points and opportunities for improved UI.
- Contributed to websites with millions of daily views, across industries from retail to travel, significantly improving user engagement and conversion rates through data-driven research.

CNN, Atlanta, GA June 2022 - August 2022
UX Research Intern

- Architected content discovery and engagement strategy for CNN's Gen-Z/Millennial audiences, developing data-driven approaches to content recommendation and community growth that projected 15% membership increase across 7K+ daily users.
- Led cross-functional growth initiative spanning CNN Audio, Digital, and Television teams, developing insights frameworks that balanced stakeholder needs across multiple user types.
- Synthesized insights from 1000+ survey respondents and conducted 5+ in-depth user interviews to develop video-based presentations that shaped platform design strategy and community engagement initiatives.

dcdx (formerly Gen Z Designs), Remote February 2021 - May 2021
Head of Research

- Led research initiatives that secured 3 new business opportunities and expanded market presence within first month.
- Conducted longitudinal studies on Gen-Z content consumption patterns and digital news engagement through 3 long-term studies, including 50+ interviews and 100+ survey responses, translating findings into creative storytelling deliverables.
- Redesigned content strategy and editorial approach, growing audience engagement across multiple platforms by 200 followers in two weeks through data-informed storytelling techniques.
